

PharmLabs San Diego Certificate of Analysis

3421 Hancock St, Second Floor, San Diego, CA 92110 | License: C8-000098-LIC
ISO/IEC 17025:2017 Certification L17-427-1 | Accreditation #35368

Sample Skywalker 10

e ID SD230627-119 (60485)

Matrix Flower (Inhalable Cannabis Good)

Sampled -
Analyses executed CANX

Received Jun 27, 2023

Reported Jun 30, 2023

Laboratory note: The estimated concentration of the unknown peak in the sample is 0.10%. Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated DB products) from which we believe to be either (+)-9B-THC or d9-THC. At this time there are no reference standards available for (+)-9B-THC (+)-9B-THC is a different compound from the main (-)-9B-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)-9B-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)-9B-THC and d9-THC with the majority, if not all, of the concentration being (+)-9B-THC. Total (+)-/d9 Concentration is estimated to be: 11%

CANX - Cannabinoids Analysis

Analyzed Jun 30, 2023 | Instrument HPLC-VWD | Method
The expanded Uncertainty of the Cannabinoid analysis is approximately 7.81% at the 95% Confidence Level

Table with columns: Analyte, LOD mg/g, LOQ mg/g, Result %, Result mg/g. Lists various cannabinoids like THCA, CBD, CBG, etc. with their respective concentrations.

UI Not Identified
ND Not Detected
N/A Not Applicable
NT Not Reported
LOD Limit of Detection
LOQ Limit of Quantification
<LOQ Detected
Above upper limit of linearity
Calony Forming Units per 1 gram
Do Not Count to Count

This report shall not be reproduced, copied in full, without the written approval of the lab. This report is for informational purposes only and should not be used to diagnose, treat or prevent any disease. Results are only for samples and batches indicated. Results are reported on an "as received" basis, unless otherwise stated. When a Pass/Fail issue is reported, that should be referred to our laboratories with tested items and lot/batch which are required for the customer to be in compliance. The measurement of uncertainty is not included in the Pass/Fail evaluation unless specifically required by Federal State or local laws and has been reported on the certificate of analysis. Measurement of uncertainty is available upon request.
